

Dear Valued Customers

As you have most likely heard, a serious security vulnerability (nicknamed “[Heartbleed](#)”) was recently revealed and has impacted many secure websites.

Aloye Hosting or Website customers are NOT impacted by this.

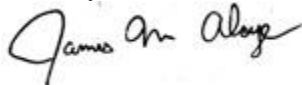

We do not use the OpenSSL cryptographic software library attributed to this vulnerability. Nevertheless, we do take the security and privacy of your data very seriously.

There are a few common-sense ways to continue to protect your accounts (at Aloye Computer Enterprises and other websites):

- Protect your password and change it regularly
- Don't re-use your password
- Ensure you use unique passwords for each web service you are subscribed to

If you have any questions please get in touch with us. For additional information visit <http://heartbleed.com/>

Sincerely,

Jim Aloye | CEO
Aloye Computer Enterprises
